1. The following is an examiner's statement of reasons for allowance: The prior art of record does not teach or fairly suggest an embossing apparatus comprising a rotary embossing device having an outer peripheral surface and including a first embossing component which extends radially outward from the peripheral surface and is configured to provide for a first embossing pattern; a first base embossing segment operatively joined to a rotary shaft member and configured to carry a first base section of the first component; a first supplemental embossing segment operatively joined to be selectively positionable on the rotary shaft member and configured to carry a first supplemental section of the first component; a first spacing mechanism for adjusting a radial position of the first supplemental segment; and a first supplemental attachment mechanism for securing the radial position of the first supplemental segment, as claimed in claims 1 and 3. The prior art of record does not teach or fairly suggest an embossing process comprising rotating a rotary embossing device having an outer peripheral surface and a first embossing component configured to extend radially outward from the peripheral surface to provide for a first embossing pattern, wherein the rotary embossing device includes a first base embossing segment which is operatively joined to a rotary shaft member and a first supplemental embossing segment which is joined to the rotary shaft member and is selectively positionable on the rotary shaft member, and wherein a radial position of the first supplemental segment on the rotary shaft member is adjusted with a first spacing mechanism, and the radial position of the first supplemental segment is secured with a first supplemental attachment mechanism, as claimed in claims 9 and 11.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
